## Experience

### Ford Motor Company Product Design Intern

May 2018 - August 2018

Working with the Global UX team at Ford, I designed aspects of future autonomous vehicles. I got to work on several projects and host my own exploration into how autonomous vehicles could increase the mobility of the elderly.

### Dot Lab UI/UX + Front-End Development Intern

May 2017 - August 2017

Dot Lab is a biotech startup that is focused on endometriosis detection. I was able to get involved with building the entire brand identity of the company from ground-up. The second half of the internship was developing the company's website.

## Extracurriculars

### Berkeley Innovation Director of Education

Present

I create the curriculum for consultants of Berkeley Innovation. I train new consultants through workshops and find relevant resources for various project teams and consultants.

### Human-Centered Design Decal Instructor

Present

I instruct around 100 students per semester on the fundamentals of design theory and practice with a focus on human-centered design.

## Education

### UC Berkeley

**B.A. Neurobiology,  
Computer Science minor**

2016 - Present
